The Netherlands, Belgium, France and Germany join the forces in the Energy Transisition

The Netherlands, Belgium, France, and Germany join forces in the Energy Transition

Sustainable Asset Management can be a valuable tool in this regard. To achieve this, especially with/by/for the Manufacturing industry, an international Western European consortium has established the MORE4Sustainability project. This collaboration involves the Netherlands (NVDO), Belgium (Bemas), Germany (FVI), and France (EMC2). The project is led by Bemas and coordinated in partnership with Mainnovation.
