# 8th Symposium on Fuel Cell Modeling and Experimental Validation (Bonn)

**Datum:** Dienstag, 8. März 2011 (Ganztägig) bis Mittwoch, 9. März 2011 (Ganztägig)

This 2-day symposium is the 8th in the series of annual events initiated in 2004 by the Swiss Federal Energy Office. Taking place yearly in March, the symposium alternates locations between Switzerland and Germany. Attendance is about 100 participants from academia and industry in European countries, USA and Canada. The symposium provides excellent opportunity to discuss new ideas and create international collaborations. The Forschungszentrum Jülich invites you to present your work at the 8th conference on Fuel Cell Modeling and Experimental Validation.

**Scope**
The symposium is focused on advances in modeling of all fuel cell types with the emphasize on PEFC, HT-PEFC, DMFC and SOFC. This year battery modeling is included into the program to represent the growing trend of linking fuel cell and battery research.
